Outline for CNSR-Transition Award Annual Review, March 13, 1997

1. Introduction
   a. Terms of Reference of Award
   b. Strengths of Past Year
   c. Weaknesses of Past Year
   d. Outline of Presentation to Follow
2. Active Studies
   a. Cusp Processes and Patch Formation
   b. Characteristics of Subvisual Polar Cap Auroras
   c. Wave Spectrum at the Very High Latitude Mesopause
3. Inactive Proposed Studies
   a. Patch Studies
   b. Polar Arc Studies
   c. Neutral Atmosphere Studies
4. Search for Permanent Employment
   a. University of Saskatchewan
   b. University of Calgary
   c. Industry (in Saskatoon?)
5. Search for Alternate Equipment Funding
   a. NSERC Research Grant
6. Other Activities
   a. CSA Small Payloads Proposal (NiteOwl)
   b. Polar Camera Refurbishment, Repair, and Recalibration
7. Future Plans
   a. Completion, Testing, and Implementation of OH Temperature Algorithm
   b. Completion and Publication of Dec94 OH study
   c. Further work on polar arc tomography with R.A. Doe
   d. Continued collaboration with P. Prikryl on patch formation
   e. Peaceful Valley Workshop on Plasma Structuring
   f. Completion and Publication of Single-Point Auroral Stereoscopy study
   g. NiteOwl Phase A + ...
      i. Possible scenarios and suggestions
8. Concluding Remarks
