12 October 1995

NovaStor Corp.
30961 Agoura Road
Westlake Village, CA 91361
U.S.A.

To whom it may concern:

I would like to know whether NovaStor's NovaBack product is now, or will in the future be, available for any or all of the following operating systems: Windows '95, Windows NT, or Linux. I have used NovaBack for several years on DOS platforms, with considerable satisfaction. I am planning to move to a new PC, on which I will be running, at a minimum, Windows '95, and possibly either Windows NT or Linux. It would be a great help to me to have NovaBack available to meet my extensive data archiving and restoration requirements. I will be reading backup tapes created with NovaBack 3.6 (or earlier).

I would also like to be placed on your mailing list for announcements of new and enhanced products. My full mailing address is as follows:

> Dr. David P. Steele
> Institute of Space and Atmospheric Studies
> University of Saskatchewan
> 116 Science Place
> Saskatoon, SK, CANADA
> S7N 5E2

Thank you very much for your attention to my requests. I look forward to hearing from you at your earliest convenience.

Yours truly,

David P. Steele, Ph.D.

P.S. Have you considered getting on the Internet? I checked for your WWW home page before writing to you, but found that there was no electronic means of contacting you, and that the contact information was nearly 2 years old.
