```
@ECHO OFF
REM     ZIPQLOOK.BAT
REM
REM     This batch program makes a PKZIP archive of the latest KI
REM     quick look file and writes it to the floppy in drive A:
REM     It prompts the user for all the appropriate actions.
REM
REM     Modified 10 October 1995 by DPS:
REM     This batch program now makes a PKZIP archive of all the QLOOK.##
REM     files in C:\TMP and writes the archive to the floppy diskette in
REM     drive A:.

ECHO Take the write-enabled 5.25" floppy disk leaning against the front of
ECHO the computer, and insert it in the upper disk drive.  This batch program
ECHO will first DELETE ALL FILES from the floppy disk (that's OK, type Y and
ECHO press ENTER), and then write a new file onto it.  When you are ready to
ECHO proceed, press any key TWICE to continue.
PAUSE > NUL
PAUSE > NUL
ECHO •
DEL A:\*.*
C:\UTILS\PKZIP A:\%YEAR%%MONTH%%DATE%QL.ZIP C:\TMP\QLOOK.*
DIR A:\
C:\UTILS\PKZIP -V A:\%YEAR%%MONTH%%DATE%QL.ZIP
DEL C:\TMP\QLOOK.*
ECHO •
ECHO The floppy disk now contains a PKZIP'ed quick look file archive, suitable
ECHO for FTP transfer to Saskatoon as a BINARY file.  Please remove it from
the
ECHO disk drive and press any key TWICE to continue.

ECHO •
ECHO Please take the floppy to the FTP server and copy the .ZIP file on this
ECHO diskette to directory \STEELE.  If this directory does not yet exist,
ECHO please create it first.  After transferring the .ZIP file please inform
ECHO me by sending e-mail to steele@skisas.usask.ca.
ECHO                                --------
ECHO                    Many Thanks and Good Luck!
ECHO                                --------
ECHO Once you have read this message, press Ctrl+Alt+Delete to reboot.
