E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.

E. P. 324.3 Winter 1996
Assignment #11 Due Apr. 9, 1996

(Final)

Beer and Johnston, Vector Mechanics for Engineers, 5th ed.

Chapter 18:

Problem 18.54, p. 914.

Problem 18.64, p. 916.
(Assume the initial aircraft velocity is in the direction from the disk center to the yoke axis.)

Problem 18.83, p. 926.

Problem 18.89, p. 927.
(Neglect the difference between I and I'.)

Problem 18.91, p. 928.
(Let the *Z* axis of the fixed coordinate system lie along the line *OC*.)

Problem 18.97, p. 929.
