Re: NITEOWL project

Dear Wally:

Thanks again for the meeting last Friday and for Bristol's hospitality to Ted and myself. We are working hard on coming up with experiment dimensions, mass, and power requirements, and I will forward those to you as soon as we have them.

I am enclosing three copies of the NITEOWL project logo of which I spoke at the meeting. Please share them with interested colleagues, with my compliments.

With best regards, I am

Yours truly,

David P. Steele
