Re: Registration for MPEGPlay v. 1.61

Dear Mr. Simmons:

Please find enclosed a money order for US$25.00 to cover the registration cost for MPEGPlay, v. 1.61. I understand that you will send me a registered copy of the latest version, that will play MPEG files longer than 1 MB. If there is any hard-copy documentation for the Player, I would appreciate receiving that as well.

I have one suggestion for the Player. On a PC with a Pentium 120 MHz processor, I sometimes find that the whole file has played before I can hit the Stop button. This is very frustrating. Can you make it possible for the user to set the Player to Pause before playback, so that the single-frame advance feature can then be used? I realize that a Loop option exists, but I have sometimes had the Player run through a whole file downloaded from the Internet only once and then quit, before I could set the Loop option.

Thank you for producing MPEGPlay. I look forward to using it with a clear conscience. When you send me the registered version, please advise me of your policy on version upgrades for registered users. By the way, my e-mail address is David.Steele@usask.ca, and the snail-mail address is on the letterhead.

With best regards, I am

Yours truly,

David P. Steele

Encls.
